

Know Your Options

CLARITY IS THE BEST COVERAGE

See the full picture

Choosing coverage is easier when you can see everything available to you. Benefits All In (BAI) does the research and lays out your options clearly, so you can choose what fits your household.

It starts with a short, confidential Household Needs Survey. From there, your dedicated Education Resource Specialist walks you through the options worth a closer look.

Plan Review

We check your current plan against what your household actually uses, from your doctors and prescriptions to deductibles.

Option Comparison

We compare your employer's plan with the federal, state, retirement, and private programs your household may qualify for.

Plain-Language Guidance

No jargon. We explain plan details in everyday terms, so you understand each choice and what it could mean for your family.

Year-Round Support

The same specialist stays with you through open enrollment, life changes, and every question that comes up along the way.

"The time, research, and documentation my BAI specialist provided was extremely helpful. Her assistance really helped take the burden off of me to figure this all out on my own."

- April, manufacturing professional
